

## Mt. Fuji Observation and Onsen Tour 2024

Post-taikai bus excursion is back after 6 years absence.

We planned to visit around Mt. Fuji.

Mt. Fuji is the highest mountain in Japan and an active volcano. It erupted last in 1707.

There are lots of viewing points, hot springs (Onsen), gourmet foods, museum and amazing nature around Mt. Fuji. The five lakes and eight ponds at the base of Mt. Fuji are especially famous. You can take many beautiful photos of Mt. Fuji with the lakes or ponds. These lakes and ponds were created by eruption.

Mt. Fuji was registered as a World Cultural Heritage site in 2013.
